Vendor Rating Management

for Microsoft Dynamics 365 Business Central

In increasingly global markets, you can only succeed in the long term if your supply chains function properly. In this context, early recognition of your suppliers' strengths and weaknesses takes on central importance for your success.

With the **"Vendor Rating Management"** app for Microsoft Dynamics 365 Business Central, you can easily rate your vendors and measure their performance. By individually prioritizing your rating criteria, you can build a rating system that suits your company.

Highlights

- Qualitative and quantitative rating criteria
- Individual point system for classification
- Rating guidelines according to creditor and item groups
- Planning and implementation of audits
- Individual rating of specific business transactions incl. templates
- Standard values for levelling the assessment
- Automatic and manual ratings incl. documentation
- Evaluation of external manufacturers (extended workbench)

Your Benefits

Benefit from measurable vendor relationships to ensure availability and quality.
